ASP.NET Core

Angular, React

Microservices

CI/CD

Cloud (AWS/AZURE)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **6+ years** of enterprise software experience. Currently leading **Workforce Brokers** — a multi-tenant Staffing & Workforce Management platform for US clients. Expert in .NET Core, Angular, Microservices, API design, and cloud deployments (AWS, Azure). Shipped production solutions across HRMS, Workforce Management, Blockchain-MLM, and E-Commerce. Pursuing **AWS Solutions Architect – Associate (SAA-C03)** certification.

TECHNICAL SKILLS

Frontend: Angular (v16–v20), React.js, RxJS, JavaScript, jQuery, AJAX, Razor Pages

Backend & Security: .NET Core 10/9/8/7, ASP.NET MVC, C#, EF Core, Dapper, LINQ, ADO.NET, Window Services, Auth0, MFA, JWT, SSO

Database: MS SQL Server, MySQL, MongoDB, ATLAS GO

Architecture & Patterns: Microservices, N-Tier Architecture, Smart Contracts, Blockchain, Agile/Scrum

Cloud & DevOps: AWS (EC2, S3, SES), Azure (DevOps, Blob), CI/CD (CodePipeline, GitHub Actions), IIS, Docker, Kubernetes

Tools & Observability: AutoMapper, Quartz, Serilog, SonarQube, Sentry, Github CodeQL, Power BI, Postman, Git, Azure Boards, JIRA

AI Productivity: GitHub Copilot, Cursor, Claude AI, ChatGPT, OpenAI API

Professional Competencies: Effective Communication, Team Collaboration, Analytical Thinking, Problem Solving, Time Management

Certifications: AWS Solutions Architect – Associate (SAA-C03, **In Progress**)

WORK EXPERIENCE

NeoSOFT Technologies, Noida — *Software Engineer, Full Stack*

Apr 2024 – Present

- Leading development on **Workforce Brokers**, a multi-tenant Workforce Management & Staffing platform for US enterprise clients, within a team of **10** (including QA); managing feature delivery across Admin Portal, Apply Portal, and Clock App.
- Owned and shipped **8+ core modules** including Applicant Management, Recruitment, Client & Project Management, Payroll, Billing & Invoicing, Reports & Analytics, and Onboarding through new feature development, bug fixes, and change requests.
- Integrated **Auth0 with MFA** for enterprise authentication; configured **AWS SES** for transactional email, **S3** for document storage, and **EC2** for deployment — cutting infrastructure setup time by **~40%** via CI/CD (AWS CodePipeline & GitHub Actions).
- Designed HRMS microservices (Employee Master, Department Master, Role Master, Shift Master) supporting multi-company approval hierarchies and configurable workflow rules.
- Built Attendance module integrating **biometric + manual inputs** with rule-based validations, reducing manual HR reporting effort by **~30%** across multiple companies.
- Used **GitHub Copilot, Cursor, and Claude** for AI-assisted development, cutting sprint delivery time across the team.
- Led **Angular frontend migration from v8 to v20**, modernizing the codebase, removing deprecated APIs, and improving build performance across the platform.
- Owned the full **multi-environment deployment pipeline** (QA → UAT → PROD) on AWS, coordinating releases and ensuring zero-downtime deployments for enterprise clients.
- Acted as **Senior Developer** — mentored junior developers, led code reviews, and coordinated team-wide technical decisions to keep releases on schedule.
- Provided **after-hours on-call support** across US time zones to resolve critical production incidents, maintaining platform stability and client SLAs.
- Received written appreciation from **Technical Project Manager** for outstanding technical ownership, timely issue resolution, and cross-timezone dedication.

Stack: Angular 20 | .NET Core 10 | MySQL | Dapper | EF Core | JWT | Auth0 | MFA | Serilog | Window Service | AWS SES | S3 | EC2 | ATLAS GO | CI/CD (CodePipeline & GitHub Actions)

Rimark Technologies, Lucknow — *Software Engineer, Full Stack*

Oct 2021 – Mar 2024

- Architected and launched **5+ client projects** across MLM, Blockchain, and E-Commerce domains using N-Tier architecture, reducing system downtime by **~25%** through improved service isolation and scalability.
- Built **Ruby Stake Wallet** and **Ruby Coin** — two blockchain-based MLM platforms on the Ruby Blockchain with full API integration for staking, crypto transactions, and reward distribution, serving **1M+ active users**.
- Developed **Click One Go**, a multi-vendor E-Commerce marketplace with affiliate sales features, supporting local businesses, artisans, and entrepreneurs across multiple seller tiers.
- Troubleshooted and addressed **30+ critical** database and application performance issues; performed vulnerability patching and mitigated security weaknesses in production environments.
- Collaborated directly with customers, project managers, and end-users to gather requirements and deliver complex, multi-team projects on schedule.

Stack: Angular 16/19 | .NET Core 7/9 | ASP.NET MVC 5 | MS SQL | EF Core | Dapper | Serilog | JWT | IIS

Soft One Global, Lucknow — *Software Developer*

Mar 2021 – Sep 2021

- Eliminated **20+ critical** database and application performance issues, improving response times across **3 client web applications**.
- Designed and implemented database schemas and table structures, improving query efficiency and data integrity for production systems.
- Analyzed requirements and generated system logic for new features, scripted tests, and deployment procedures.

Mecatredz Technology, Lucknow — *Apprenticeship Trainee*

Sep 2020 – Mar 2021

- Completed **4 code projects** on schedule by collaborating with senior developers; applied coding standards in software design and architecture.
- Identified and fixed **15+ software bugs** through systematic debugging, code reviews, and pair-programming sessions.

KEY PROJECTS

Workforce Brokers – Workforce Management & Staffing Platform

Mar 2025 – Present

Team: 10 (incl. QA) | Domain: Workforce Management, Staffing & Recruitment (US Clients)

Multi-tenant platform managing Applicant Tracking, Recruitment, Client/Project Management, Payroll, Billing & Invoicing, Time & Attendance (Clock App), Reports & Analytics, and Onboarding Portal — all from a centralized Admin Portal serving multiple US client organizations.

Stack: Angular 20 | .NET Core 10 API | MySQL | Dapper | LINQ | EF Core | JWT | Auth0 | MFA | Serilog | Window Service | AWS SES | S3 | EC2 | ATLAS GO | CI/CD (CodePipeline & GitHub Actions) | GitHub Copilot | Cursor | Claude

Human Resource Management System (HRMS)

9 Months | Team: 10

Domain: Human Resources | Architecture: Microservices

Centralized multi-company HRMS covering Recruitment, Employee Management, Core HR, dynamic Workflow Engine, Attendance (biometric + manual), Shift Management, and Payroll with company-specific approval hierarchies.

Stack: Angular 18 | .NET Core 8 | MongoDB | SQL Server | EF Core | JWT | Serilog | Quartz | Azure DevOps | Azure AD | Azure Blob Storage | SSO

Ruby Stake Wallet & Ruby Coin – Blockchain MLM Platforms

4 Months each | Team: 3

Domain: MLM, Cryptocurrency | Users: 1M+

Two Ruby Blockchain-based MLM platforms for staking Ruby Coins, earning rewards, and managing crypto transactions with full Ruby Blockchain API integration.

Stack: Angular 16/19 | .NET Core 7/9 | MS SQL | EF Core | Dapper | Serilog | JWT | IIS

Click One Go – Multi-Vendor E-Commerce Platform

4 Months | Team: 3

Multi-vendor marketplace with affiliate sales features supporting local businesses, artisans, and entrepreneurs across multiple seller tiers.

Stack: ASP.NET MVC 5 | MS SQL | jQuery | AJAX | Basic Auth | IIS

EDUCATION

Master of Computer Applications (MCA) — *Computer Science & Programming*

Aug 2023 – Jul 2025

Integral University, Lucknow, India
